## Heart & Soul TALKS

- Earlier this week, the city hosted its second input meeting for its comprehensive plan. John Devine with the Northeast Georgia Regional Commission conducted the meeting. The topics discussed include the city's Land Use Map, Community Work program, and Transportation Plan. We will host the final public hearing for the comprehensive plan in late November. We invite all interested parties to attend.

➤ The city recently made some repairs to the boardwalk on the walking trail on the Coke Street R-O-W. We tightened the boards, fixed the hand railing, and put on a fresh coat of stain. We hope you like the color orange. 😊

➤ HCS Services has installed the culvert for the George Street Trail Extension. They also installed the eight helical piers for the bridge.
